

NGUYỄN HỮU ĐỨC

Full-stack Developer

+84 946 945 409 | duckg2083@gmail.com | linkedin.com/in/ducnguyendev | github.com/TonyDak

Professional Summary

Full-stack Developer with 1+ year of experience developing enterprise web and mobile applications. Experienced in building RESTful APIs, backend services, and database-driven systems using NestJS, ASP.NET Core, and Spring Boot while developing responsive frontend applications with Next.js and React Native. Passionate about backend engineering, distributed systems, and building scalable, maintainable production software.

Technical Skills

Languages: TypeScript, JavaScript, C#, Java, C++, SQL
Frontend: Next.js, React.js, React Native, Expo, HTML5, CSS3, Tailwind CSS
Backend: NestJS, ASP.NET Core Web API, Spring Boot, RESTful API, WebSocket, JWT Authentication
Databases: PostgreSQL, MongoDB, MySQL
Messaging & Caching: Apache Kafka, Redis
Tools & DevOps: Docker, Docker Compose, Git, Postman, Swagger, Firebase, Linux
Architecture: Clean Architecture, Multi-tenant Systems, Event-driven Architecture, Microservice Architecture

Professional Experience

KAS Technology Aug 2025 – Present
Full-stack Developer *Ho Chi Minh City, Vietnam*

- Developed and maintained enterprise web applications using Next.js, React, and TypeScript.
- Built cross-platform mobile applications using React Native and Expo.
- Designed and implemented RESTful APIs and backend business logic using NestJS and ASP.NET Core.
- Developed database-driven features with PostgreSQL, MongoDB, and MySQL, including schema design and query implementation.
- Integrated authentication, realtime communication, notifications, payment-related services, and third-party APIs into production systems.
- Investigated production issues, performed root-cause analysis, and implemented fixes to improve application stability.
- Collaborated with Product Owners, UI/UX Designers, QA Engineers, and cross-functional development teams throughout the software development lifecycle.

Personal Project

Microservice Social Platform | *Spring Boot, Spring Cloud, Kafka, Redis, Keycloak, Docker*

GitHub: github.com/TonyDak/social-networking-microservice

- Designed and implemented a microservice-based social networking platform to explore distributed system architecture.
- Built independent services for authentication, user management, friendship management, and realtime messaging.
- Implemented Spring Cloud Gateway, Eureka Service Discovery, and Keycloak-based authentication with JWT and Google Login.
- Applied synchronous REST communication and asynchronous event-driven communication using Apache Kafka.
- Improved performance with Redis caching and implemented realtime messaging using WebSocket.
- Applied database-per-service architecture using MySQL and MongoDB.
- Containerized the entire system using Docker and Docker Compose for reproducible deployment.

Education

Sai Gon University Oct 2021 – 2026
Engineer of Information Technology *Ho Chi Minh City, Vietnam*
